# Introduction

## Features

The DCH-Z310 mydlink™ Z-Wave Smoke Alarm is a wireless early warning detection system that warns you of developing fires by broadcasting audible alarms via its built-in horn. Based on Z-Wave Plus™ technology, it offers longer battery life, faster operation, better RF coverage, and easier installation while keeping compatibility with classic Z-Wave™ products. You can set an alarm via the mydlink™ Home app so when you're away, the DCH-Z310 will be enabled and ready to send signals to a hub such as the mydlink™ Home Connected Home Hub. When the alarm is triggered, it will generate an 85 dB (max) audio alarm while pushing instant notifications to your mobile device, so you can stay informed from wherever you are.

### **Works With Other D-Link Connected Home Devices**

The mydlink™ Z-Wave Smoke Alarm can trigger other D-Link Connected Home devices, so you can customize your own home automation system to suit your purposes.

### **mydlink™ Home**

Manage your smoke detector and connected appliances by using the mydlink™ Home app available for iPhone®, iPad®, iPod touch®, and Android™ devices. Its intuitive user interface and simple instructions let you easily manage your automated devices from anywhere.

### **Simple Setup**

Through the free easy-to-use mydlink™ Home app, you can quickly and easily connect the DCH-Z310 to an existing network. The setup wizard will even guide you through the setup process, so you can get your home automation devices up and running in no time.

# Hardware Overview

## Front/Bottom

1	<b>Pairing / Unpairing / Test / Reset Button &amp; LED</b>	Press the button three times quickly to set the device to Add or Remove mode. Press the button three times and hold the fourth time until you hear a beep to reset the DCH-Z310 to the factory default settings.	
		Blinking Red	The alarm has been triggered.
		Light Off	The alarm has not been triggered.
2	<b>Speaker</b>	Alarm sounds when the sensor is triggered.	

# Hardware Overview

## Back

1	<b>Tamper Switch</b>	If the detector is removed from a surface (wall, ceiling, etc.), the alarm will sound.
2	<b>Battery Compartment</b>	Open the cover and insert a CR123A battery to power the device.

# Wireless Installation Factors

The mydlink™ Z-Wave Smoke Alarm connects to your home automation network using your existing wireless network. Keep in mind, however, that the number, thickness, and location of walls, ceilings, or other objects that the wireless signals must pass through, may limit the range. Typical ranges vary depending on the types of materials and background RF (radio frequency) noise in your home or business. The key to maximizing wireless range is to follow these basic guidelines:

1. Keep the number of walls and ceilings between the extender and other network devices to a minimum - each wall or ceiling can reduce your adapter's range by up to 98 feet (30 meters). Position your devices so that the number of walls or ceilings is minimized.
2. Be aware of the direct line between network devices. At a 45-degree angle, a wall that is 0.5 meters thick (1.5 feet) appears to be almost 1 meter (3 feet) thick. At a 2-degree angle it can appear over 14 meters (45 feet) thick! Position devices so that the signal will travel straight through a wall or ceiling (instead of at an angle) for better reception.
3. Building materials make a difference. A solid metal door or aluminum studs may have a negative effect on range. Try to position access points, wireless routers, and computers so that the signal passes through drywall or open doorways. Materials and objects such as glass, steel, metal, walls with insulation, water (fish tanks), mirrors, file cabinets, brick, and concrete can degrade your wireless signal.
4. Keep your product away (at least 3-6 feet or 1-2 meters) from electrical devices or appliances that generate RF noise.

# Hardware Installation

## Choosing a Location

For complete coverage in residential buildings, smoke sensors should be installed in all rooms, halls, storage areas, basements and attics. The minimum coverage is one sensor on each floor and one in each sleeping area.

- Install the smoke sensor as close to the center of the ceiling as possible. If this is not practical, install the sensor on the ceiling no closer than 50 cm from any wall, ceiling joists, or fixtures.
- Install the mydlink Home Smoke Detector as horizontally level as possible at an inclination angle of no more than 20°.
- In case you must install the DCH-Z310 in a room with a steep ceiling slope, mount it at least 50 cm but no more than 1 m below the ceiling peak.
- If mounting on the ceiling is not possible, mount the sensor on the wall 4 - 6 inches (10 - 15 cm) from the ceiling.
- If the area to be monitored is greater than 60m<sup>2</sup> or is separated by ceiling joists, install multiple mydlink Home Smoke Detectors for better coverage.

**Figure 1:**

Leave a minimum of 50 cm length between the alarm and any wall or corner.

**Figure 2:**

If installing on an inclined ceiling, leave a minimum of 50 cm but not more than 100 cm length between the alarm and the ceiling peak.

To avoid false alarms, do not install smoke sensors in the following situations:

- Combustion particles produced by burning will trigger the alarm. These are commonly found in kitchens with few windows or poor ventilation, garages where there may be vehicle exhaust fumes, or near furnaces, hot water heaters, and space heaters. Position your smoke detector at a distance greater than 20 feet (6 m) from the source of combustion particles. If a 20-foot distance is not possible, e.g. in a mobile home, try to install the alarm as far away from the combustion particles as possible, preferably on the wall, and keep the location well-ventilated.
- In very dusty or dirty areas, dirt and dust can build up on the alarm's sensing chamber, and make it overly sensitive. Additionally, dust or dirt can block the openings to the sensing chamber and prevent the alarm from sensing smoke effectively.
- Electrical "noise" from fluorescent lights may cause false alarms. Install the smoke sensor at least 5 feet (1.5 m) from fluorescent lights.

**Warning:**

- Do not mount the mydlink Home Smoke Detector near air vents or wherever there are strong drafts, heavy steam, smoke, or dust.
- Do not paint the DCH-Z310 as paint may clog the vents and prevent proper functioning.
- Do not use a burning cigarette to test the DCH-Z310 as cigarette smoke clogs the vents. Use the test button to check the device's functionality.
- Never remove the battery from smoke alarm to stop a nuisance alarm. Open a window or fan the air around the smoke alarm to get rid of the smoke. The alarm will turn itself off when the smoke is gone. If nuisance alarms persist, attempt to clean the smoke alarm as described in this User's Manual.
- Do not stand close to the smoke alarm when the alarm is sounding. The alarm is loud in order to wake you in an emergency. Too much exposure to the horn at close range may be harmful to your hearing.

# Placement Examples

The following diagrams are examples of where you can place DCH-Z310 units to ensure thorough coverage of your environment.

- Install a separate smoke alarm in every bedroom and one on each floor excluding the kitchen and bathroom for minimum coverage.

- Install a separate smoke alarm in every bedroom and an additional one in the hallway for best coverage.

# Placement for Multi-floor Residences

If you have more than one floor to cover, install DCH-Z310 units in the following recommended locations for the best coverage.

## Mounting the Device

### Step 1:

Draw a horizontal line that is six inches long at your chosen install location.

### Step 2:

Remove the mounting bracket from your device by rotating it counter-clockwise.

### Step 3:

Place the bracket so that the two longest hole slots are aligned with the horizontal line you drew in Step 1. In each keyhole slot, use a pencil to mark the location for the plastic anchors and screws.

### Step 4:

Remove the bracket from the wall. Depending on the material of the wall or ceiling, use appropriate tools to drill two holes at your markings. After drilling the holes, insert the plastic anchors to support the screws.

### Step 5:

Screw the bracket into the wall. Line up the bracket and the smoke sensor, then push the sensor onto the mounting bracket.

### Step 6:

Attach the cover to the mounting bracket for your device by turning it clockwise to fix it into place. Ensure that the smoke sensor is securely attached to the mounting bracket.

# Setting Up Your Device

To install your DCH-Z310, first download and install the mydlink™ Home app on your mobile device. This app will walk you through installing and configuring your DCH-Z310.

## Step 1:

On your mobile device, download mydlink Home by going to **mydlinkhomeapp.dlink.com**, or by searching for **mydlink Home** in the iTunes App Store or Google Play.

## Step 2:

Launch the mydlink Home app and create a new account or sign in to your existing account.

## Note:

**iOS:** If you are asked about allowing the app to access your location, select **Allow**.

**Android:** Make sure location services are turned on in your phone's settings.

## Step 3:

After logging in, tap the **Settings** icon  in the top-left corner, select **Add New Device**, and follow the instructions.

## Step 4:

When you are asked to scan a QR code, use the code on the Quick Install Card in your package. Alternatively, tap **Manual Setup** and follow the instructions to add it manually.

Congratulations, your DCH-Z310 is now ready to use!

**Note:** Be sure to check the [support.dlink.com](http://support.dlink.com) website periodically for the latest firmware updates to keep your product secure and up to date with the latest features.

## My Devices

Tapping the DCH-Z310 under the My Devices page will take you to the device's settings.

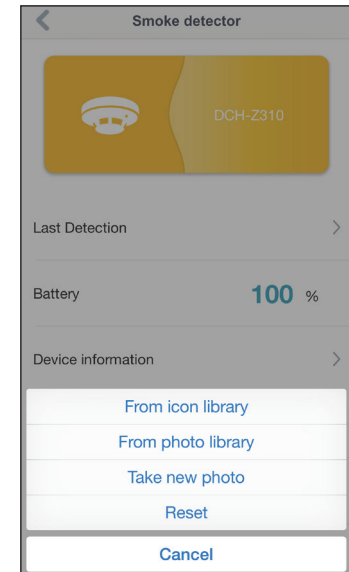

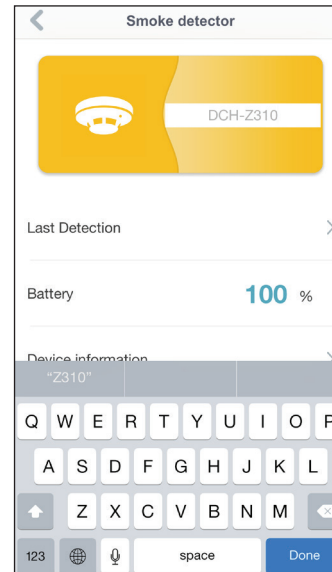

**Last Detection:** Tap to view logs of times your DCH-Z310 has detected smoke.

**Battery:** Displays the capacity left in your battery.

**Information:** This page will show detailed information about the product and your network. More details are on the next page.

To change the device name or associated icon, tap the name or the icon respectively, and enter the new name or use the menu to select a new icon.

# Information

This page shows your product and related network details.

**Product Name:** Displays the product model.

**Node ID:** Displays the node assignment of the device in your Z-Wave network.

**Reset:** Tap **Reset** to perform a factory reset and remove the device from your mydlink account.

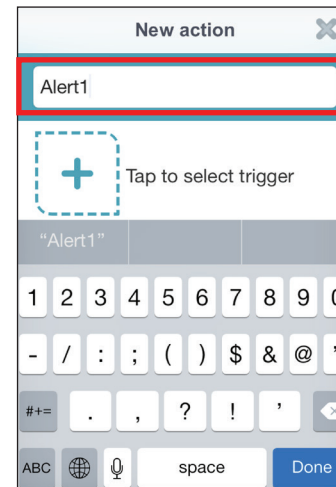

# My Actions

This page lets you add and enable/disable rules which execute actions such as notifications (responder) when your DCH-Z310 detects smoke (condition). Tap  to switch between pages.

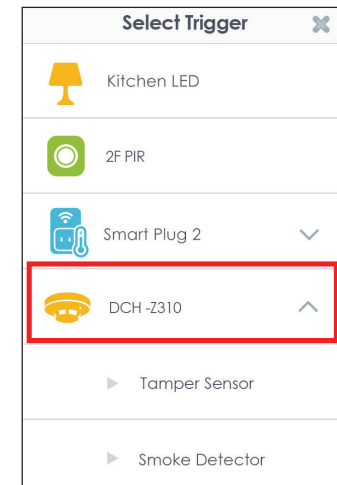

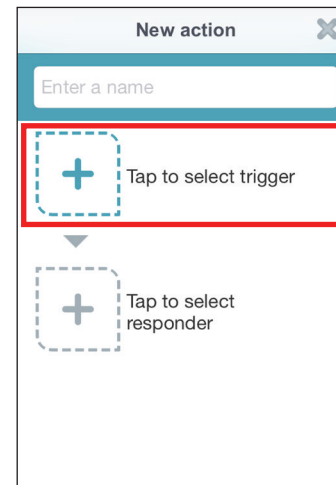

1. To add a new action for you device, tap **New action**.

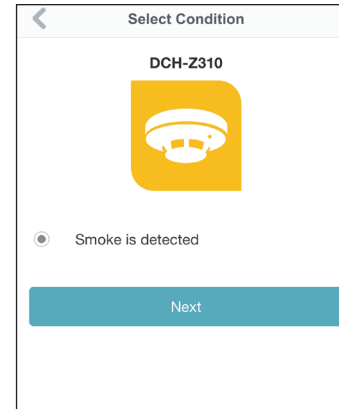

2. Type in a name for this action. Tap **Done** when you've finished inputting the name.

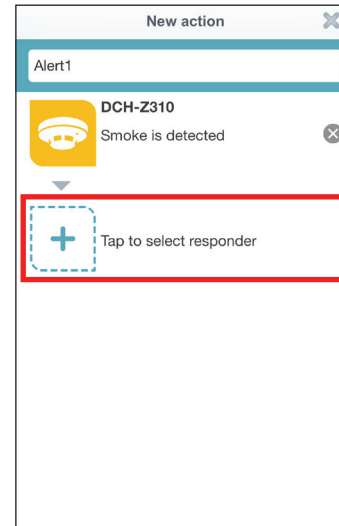

3. To select the device you want to use as the trigger for this action, tap + then choose from the list of devices.

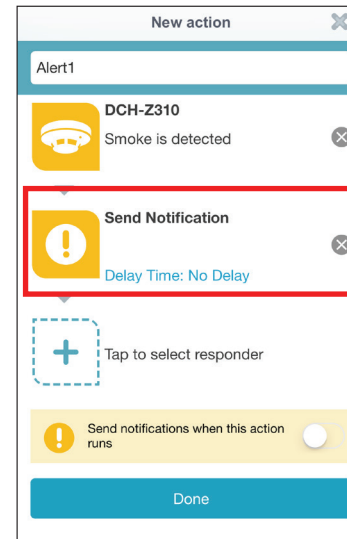

4. Select from the available conditions for this device and tap **Next**.

5. Type in a name for the new action and tap + to select from the available responders for this device.

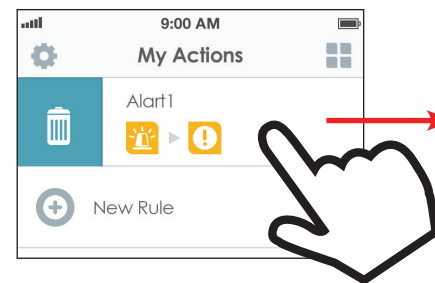

6. Select from the available responders for this device. In this example we have chosen to send a notification. Tap **Done** to finish.

7. Your new action will now appear in the My Actions main page, where you can modify it by tapping on it or disable it by tapping the toggle on the right.

8. To delete the rule, simply swipe right on the rule to show the trash icon. Tap on the trash icon to delete it.

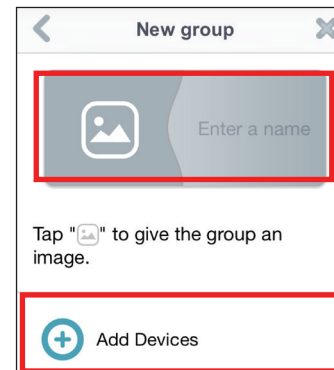

# My Places

This page lets you add devices into a group so you can easily see which devices are in a particular location.

1. To create a group, tap **New group**.

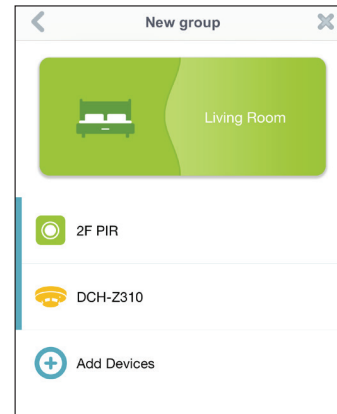

2. On the New Group page, tap the icon to choose an icon or photo for the group. Tap next to it to enter a name for the group. Then tap the + icon to add devices to the group.

3. Tick the devices to be included in this group and tap **Done**.

4. Your group is created and will show up in My Places. Tapping each device in the group will take you to their settings. You can tap the  icon to activate/deactivate the device.

# Troubleshooting

## **How do I manually add the mydlink™ Z-Wave Smoke Alarm to the network?**

Put your hub/controller in Add mode. Press the button on the front of the smoke sensor three times quickly.

## **How do I remove the mydlink™ Z-Wave Smoke Alarm from the network?**

Put your hub/controller in Exclusion mode. Press the button on the front of the smoke sensor three times quickly.

## **What if the mydlink™ Z-Wave Smoke Alarm is no longer connected to the gateway?**

Remove the smoke sensor from the network (see above). Then manually add the smoke sensor to the network again (see above).

## **How do i know if the battery is low?**

You will receive a push notification via the mydlink Home app.

# Manually Adding the Device to Your Z-Wave™ Network

The button on the front of the DCH-Z310 can be used to add or remove it from a Z-Wave network. It can also be used to reset the device to the default factory settings.

## If this is the first time you are adding the device to your Z-Wave network:

### Step 1:

Make sure your Z-Wave hub or primary controller is in Network Wide Inclusion (add) mode.

### Step 2:

Install the included battery to power on the device. When the battery is first installed in the device, it will enter Network Wide Inclusion mode to pair with a hub or controller.

### Step 3:

The device will be added to your Z-Wave network in about 5 seconds.

## For all other times:

### Step 1:

Make sure your Z-Wave hub or primary controller is in inclusion (add) mode.

### Step 2:

Quickly press the button on the front of the DCH-Z310 three times to put it into inclusion mode.

### Step 3:

The device will be added to your Z-Wave network in about 20 seconds.

# Manually Removing the Device From Your Z-Wave™ Network

**To remove your DCH-Z310 from your Z-Wave network:**

**Step 1:**

Make sure your Z-Wave hub or primary controller is in exclusion (remove) mode.

**Step 2:**

Quickly press the button on the front of the DCH-Z310 three times to put it into exclusion mode.

**Step 3:**

The device will be removed from your Z-Wave network.

# Replacing the Battery

## If the low battery warning sounds:

In case the alarm begins to chirp once every 40 seconds or so and its yellow LED also flashes once during that period, this means that the smoke battery in the alarm is almost out of power. Your controller will receive a low battery alarm and send a low battery notification. This signal means that the DCH-Z310's battery is weak. You should replace it with a new CR123A battery. This warning will last 30 days, but you should replace the battery immediately to ensure your home is protected.

**Note:** After the battery is replaced, press the test button to check if it is working properly.

### Step 1:

Open the battery compartment and remove the old battery (if applicable).

### Step 2:

Insert the new battery into the compartment, ensuring that the + and - symbols are aligned properly. After the battery is installed, you will hear a chirp which indicates the device has power.

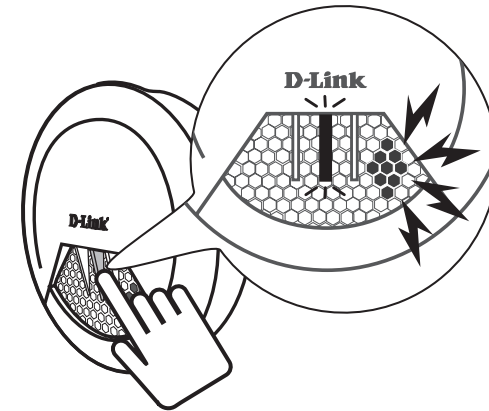

### Step 3:

Close the compartment cover.

# Testing Your Smoke Alarm

Test your DCH-Z310 by pushing firmly on the test button with your finger until the horn sounds.

If the sound pattern is three beeps, pause, and another three beeps with a flashing red LED, the alarm is working properly.

If the LED is lit yellow:	If the LED is lit red:
<p><b>Tamper Indication</b> If your alarm has been tampered with (removed from its original location), the yellow LED will stay lit. The alarm will also continue to sound until it is placed back into its mounting bracket.</p>	<p><b>Standby Indication</b> After installing the battery, pressing the test button will put the alarm into standby mode and the red LED will flash once every 10 seconds or so. It will automatically exit this mode after 10 minutes, and the red LED will only flash once every few minutes.</p>
	<p><b>Alarm Indication</b> If the detected smoke reaches the alarm threshold, the alarm will sound while the red LED flashes.</p>

**Note:****1. Duty cycle < 1 % or LBT + AFA****Usage Notes:**

- Please refer to the product manual or datasheet to check whether your product uses Z-Wave wireless, and its applicable operating frequencies band(s) and maximum RF power of your product.

**Hinweis:****1. Einschaltdauer < 1 % oder LBT + AFA****Gebrauchshinweise:**

- Überprüfen Sie im Produkthandbuch oder im Datenblatt, ob Ihr Produkt die Z-Wave-Funktechnologie nutzt, sowie die Betriebsfrequenzbänder und die maximale Funkfrequenzleistung Ihres Produkts.

**Remarque :****1. Cycle de service < 1 % ou LBT + AFA****Notes d'utilisation :**

- Veuillez vous reporter au manuel ou à la fiche technique du produit pour vérifier si votre produit utilise Z-wave sans fil ainsi que sa ou ses bandes de fréquence de fonctionnement applicables et la puissance RF maximale de votre produit.

**Nota:****1. Ciclo de trabajo < 1 % o LBT + AFA**

**Notas de uso:**

- Consulte el manual del producto o la ficha de datos para verificar si el producto usa Z-Wave inalámbrico, así como las bandas de frecuencias operativas aplicables y la potencia de RF máxima del producto.

**Nota:**

**1. Ciclo di servizio < 1 % o LBT + AFA**

**Note d'uso:**

- Consultare il manuale del prodotto o la scheda dati per verificare se il prodotto usa Z-Wave wireless, e le sue bande di frequenza operativa e la potenza RF massima del prodotto.

**Opmerking:**

**1. Duty cycle < 1 % of LBT + AFA**

**Gebruiksopmerkingen:**

- Raadpleeg de handleiding of het gegevensblad van het product om te weten of uw product draadloos Z-Wave gebruikt. In deze documentatie worden ook de gebruikte frequentieband(en) en het maximum RF-vermogen van uw product vermeld.

## **SAFETY INSTRUCTIONS**

The following general safety guidelines are provided to help ensure your own personal safety and protect your product from potential damage. Remember to consult the product user instructions for more details.

- Static electricity can be harmful to electronic components. Discharge static electricity from your body (i.e. touching grounded bare metal) before touching the product.
- Do not attempt to service the product and never disassemble the product. For some products with a user replaceable battery, please read and follow the instructions in the user manual.
- Do not spill food or liquid on your product and never push any objects into the openings of your product.

- Débranchez toujours le produit de l'alimentation avant de le nettoyer et utilisez uniquement un chiffon sec non pelucheux.

## **INSTRUCCIONES DE SEGURIDAD**

Las siguientes directrices de seguridad general se facilitan para ayudarle a garantizar su propia seguridad personal y para proteger el producto frente a posibles daños. No olvide consultar las instrucciones del usuario del producto para obtener más información.

- La electricidad estática puede resultar nociva para los componentes electrónicos. Descargue la electricidad estática de su cuerpo (p. ej., tocando algún metal sin revestimiento conectado a tierra) antes de tocar el producto.
- No intente realizar el mantenimiento del producto ni lo desmonte nunca. Para algunos productos con batería reemplazable por el usuario, lea y siga las instrucciones del manual de usuario.
- No derrame comida o líquidos sobre el producto y nunca deje que caigan objetos en las aberturas del mismo.
- No utilice este producto cerca del agua, en zonas con humedad o condensación elevadas a menos que el producto esté clasificado específicamente para aplicación en exteriores.
- Mantenga el producto alejado de los radiadores y de otras fuentes de calor.
- Desenchufe siempre el producto de la alimentación de red antes de limpiarlo y utilice solo un paño seco sin pelusa.

## **ISTRUZIONI PER LA SICUREZZA**

Le seguenti linee guida sulla sicurezza sono fornite per contribuire a garantire la sicurezza personale degli utenti e a proteggere il prodotto da potenziali danni. Per maggiori dettagli, consultare le istruzioni per l'utente del prodotto.

- L'elettricità statica può essere pericolosa per i componenti elettronici. Scaricare l'elettricità statica dal corpo (ad esempio toccando una parte metallica collegata a terra) prima di toccare il prodotto.
- Non cercare di riparare il prodotto e non smontarlo mai. Per alcuni prodotti dotati di batteria sostituibile dall'utente, leggere e seguire le istruzioni riportate nel manuale dell'utente.
- Non versare cibi o liquidi sul prodotto e non spingere mai alcun oggetto nelle aperture del prodotto.
- Non usare questo prodotto vicino all'acqua, in aree con elevato grado di umidità o soggette a condensa a meno che il prodotto non sia specificatamente approvato per uso in ambienti esterni.
- Tenere il prodotto lontano da caloriferi e altre fonti di calore.
- Scollegare sempre il prodotto dalla presa elettrica prima di pulirlo e usare solo un panno asciutto che non lasci filacce.

## **VEILIGHEIDSINFORMATIE**

De volgende algemene veiligheidsinformatie werd verstrekt om uw eigen persoonlijke veiligheid te waarborgen en uw product te beschermen tegen mogelijke schade. Denk eraan om de gebruikersinstructies van het product te raadplegen voor meer informatie.

- Statische elektriciteit kan schadelijk zijn voor elektronische componenten. Ontlaad de statische elektriciteit van uw lichaam (d.w.z. het aanraken van geaard bloot metaal) voordat u het product aanraakt.
- U mag nooit proberen het product te onderhouden en u mag het product nooit demonteren. Voor sommige producten met door de gebruiker te vervangen batterij, dient u de instructies in de gebruikershandleiding te lezen en te volgen.
- Mors geen voedsel of vloeistof op uw product en u mag nooit voorwerpen in de openingen van uw product duwen.
- Gebruik dit product niet in de buurt van water, gebieden met hoge vochtigheid of condensatie, tenzij het product specifiek geclassificeerd is voor gebruik buitenshuis.
- Houd het product uit de buurt van radiators en andere warmtebronnen.
- U dient het product steeds los te koppelen van de stroom voordat u het reinigt en gebruik uitsluitend een droge pluisvrije doek.
