D-Link
Quick Installation Guide

This product can be set up using Internet Explorer 5.x or above

DCS-5300
Home Security Internet Camera with Pan/Tilt

Before You Begin

You must have at least the following:

- Windows XP/2000/ME/98SE
- Ethernet Adapter
- CD-ROM Drive

Check Your Package Contents

These are the items included with your purchase:
If any of the below items are missing, please contact your reseller.

	DCS-2000 Internet Camera
	Installation CD (containing Drivers, Software, Quick Installation Guide and Manual)
	A/V Cable & Category 5 Ethernet Cable
	Stand & Mounting bracket
	12V AC Power Adapter

⚠ Using a power supply with a different voltage rating will damage this product and void the warranty.

System Requirements

- Internet Explorer 5.x or above
- CPU: Pentium III, 800 MHz or above (Required for use with **IP Surveillance** software)
- Memory Size: 128 MB (128 MB recommended)
- VGA card resolution: 800x600 or above

1 Hardware Installation

Connect the Ethernet Cable

Connect an Ethernet cable to the Ethernet connector located on the Internet Camera's back panel and attach it to the network.

> ⚠ If you connect this camera directly to a PC, you will need a cross-over Ethernet cable. If you plug the camera into a hub or router, you will be able to use the cable included with your camera.

Attach the External Power Supply

Attach the external power supply to the DC power input connector located on the Internet Camera's back panel (labeled DC 12V) and connect it to an AC power outlet.

> ⚠ Power source is confirmed when the LED Power Indicator on the Internet Camera is illuminated.

Both the red and green LEDs will flash alternately and only the red LED will remain lit. The the green LED will not come on until you have configured your camera.

Attach the A/V cable to the A/V out connector if you wish to connect the **DCS-5300** to your TV set.

Attach the red RCA connector to the "video" connector on your TV

Attach the black RCA cable to the "audio" connector on your TV set.

② Configuring your camera with IP Installer

Insert the **DCS-5300** CD into the CD-ROM drive.

Click on **IP Installer**
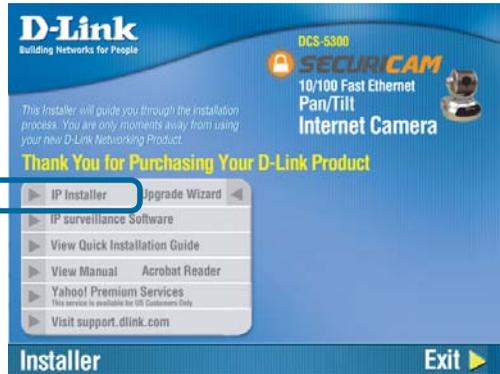

This is the first screen that will appear.

2 Configuring your camera with IP Installer (continued)

If the **IP Installer** does not display any devices, you will need to find a tool small enough to fit into the reset hole and softly press down a switch for 2 cycles (the red and green LEDs will blink continuously and stop twice). Let go when the red LED starts to flash the second time.
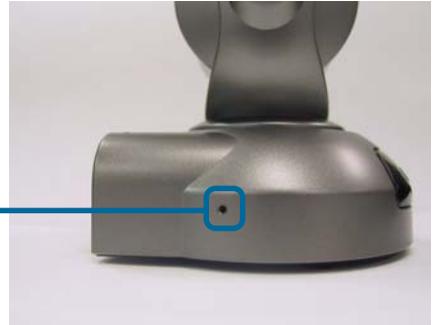

The **IP Installer** will now show a MAC address of the **DCS-5300** and an IP Address (which may or may not be correct depending on what you have your **DCS-5300** connected to.) If you have a DHCP* server on your network, there will be a valid IP Address displayed here. After a few seconds, the "assigned" column will display **yes**, indicating that the displayed IP Address is now assigned to the camera.

⚠ * A DHCP server is a device that supplies IP Addresses to its clients that are on the same network

This page will now show the IP Address assigned to the MAC address of the **DCS-5300**.

Highlight the MAC address

Click on the **Link** button

3 Viewing Your Internet Camera

After you click on the **Link** button, **IP Installer** will automatically open your Internet browser to the IP Address of the **DCS-5300**, in this example it is: http://192.168.0.146 Your **DCS-5300** may have a different IP Address.

At this point, it is highly recommended that you put in a password for security purposes.

Click on **Configuration**

Click on **Tools** and you will be in the **Admin** page, this is where you will be able to put in your password and add additional accounts to the **DCS-5300**

Enter the adminstrative password. Click **Save** then "**X**" at top right-hand corner of your Browser to close the page.
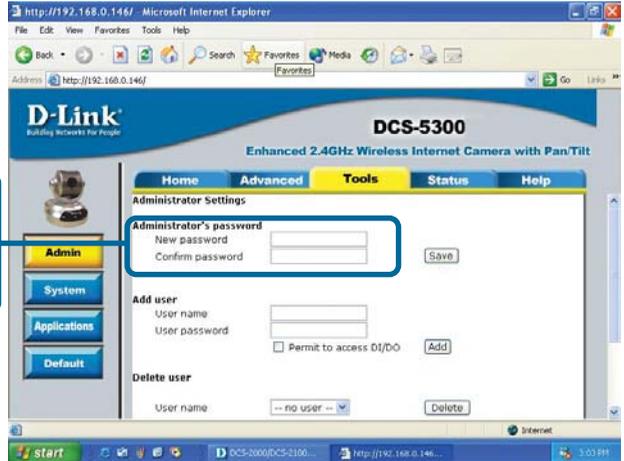

The installation and configuration of the DCS-5300 Internet Camera is now complete.

Technical Support
