- Existing 10/100 Mbps Ethernet-Based Network
- CD-ROM Drive

Check Your Package Contents

These are the items included with your purchase:

If any of the below items are missing, please contact your reseller.

System Requirements

- Java Enabled and Compliant Web Browser
- CPU: Pentium III, 450 MHz or above
- · Memory Size: 64 MB
- VGA card resolution: 800x600 or above
- Existing 10/100 Mbps Ethernet-Based Network

Hardware Installation

Attach the Swivel Stand

Locate the stand connector on the bottom panel of the DCS-900 and screw on the swivel stand to the base of the DCS-900.

Attach the External Power Supply

Attach the external power supply to the DC power input connector located on the rear panel of the DCS-900 and connect it to your local power supply. *Note:* Power source is confirmed when the green LED Power Indicator located to the right of the lens on the DCS-900 is illuminated.

Connect the Ethernet Cable

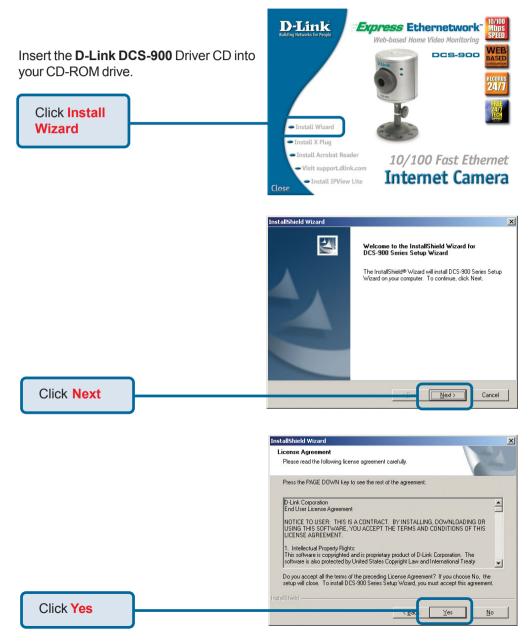

Connect the included Ethernet cable to the network cable connector located on the back panel of the DCS-900 and attach it to the network. Network Connectivity is confirmed when the orange LED Indicator on the DCS-900 located below the Power LED is illuminated

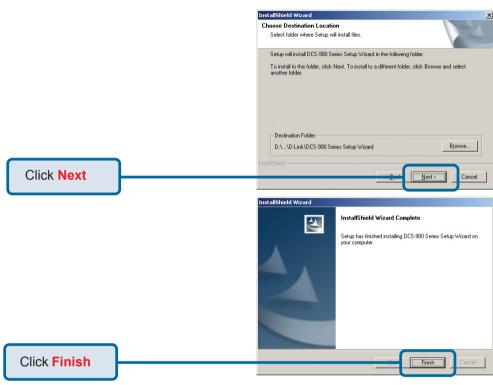

Running the Setup Wizard

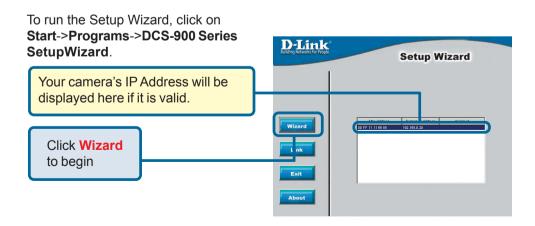

You are now ready to run the Setup Wizard, which will guide you quickly through the installation process.

Running the Setup Wizard (continued)

Running the Setup Wizard (continued)

You must change the Admin ID and Password immediately to protect your camera against unauthorized access. By default, the Admin ID and Password are blank. To change the Admin ID and Password, select both Change boxes and enter a New ID and New Password.

administrator.

Running the Setup Wizard (continued)

If you need to make any changes, click **Back** to modify your camera settings.
Otherwise, click **Restart** to save and apply your settings.

Your setup is now complete! Click Link to launch your web browser and view your images.

Click Restart

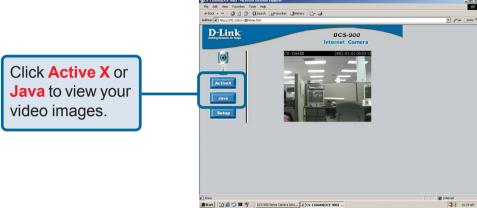

Click Link

Viewing the Streaming Video

using your favorite Web browser, type "http://address" in the address box where address is the IP address that you assigned to the camera from the previous section. Press Enter. Note: The Home screen of your camera can also be accessed from the Setup Wizard using the Link button.

Tips

- If you are installing several cameras, it is recommended to use one computer to configure all of them before you install them in your planned locations. To avoid IP address conflict, use 192.168.0.20 for the LAST camera that you plan on installing.
- Make sure that you have the latest version of Java installed on your computer to ensure proper operation when viewing the video in Java mode. Java can be downloaded for free from Sun's web site. (http:// wwws.sun.com/software/download/)
- The Xplug Control is included with the DCS-900 and should be installed
 on your computer if you want to use Active X to view your video images
 instead of Java. The Xplug Control must be installed on your computer if
 you are using the remote monitoring software. Please refer to the
 Manual included on this CD for detailed information on installing the
 Xplug Control to your computer for use with the software.
- Please refer to the Manual located on the CD-ROM for additional information regarding all features and instructions related to the DCS-900.
