Welcome to Network Magic
Welcome to Network Magic
Security and Firewall Software
Some security and firewall software may warn you when Network Magic tries to access the Internet. The warning might mention "NMSRVC.EXE" or "Network Magic Service". If you see such a warning, choose Allow or Permit to enable this connection.
Why does Network Magic need to access the Internet?
Network Magic periodically needs to connect to the Internet to check your connection, and to keep Network Magic up to date. No personally identifiable information is sent.
