## How to setup a printer

Note: DIR-320 printer setup was performed using a HP DeskJet F2280.

- 1. Please disconnect your USB printer from your computer/laptop simply by using the "Safely Remove Hardware" option and then pulling out the USB cord.
- Login to the DIR-320 web configuration page using <u>http://192.168.0.1</u>, the default username is "admin" and there is no password.

4. You will be shown an outline of the steps that are required. Before clicking Next you will need to connect the USB cable between the printer and the DIR-320.

WELCOME TO THE D-LINK PRINTER SETUP WIZARD
The wizard will guide you through the following steps. Click Next to begin.
<ul> <li>Step 1: Detect the printer</li> <li>Step 2: Launch the setup executable on your computer</li> <li>Step 3: Insert the printer driver CD if requested</li> <li>Step 4: Print a test page</li> </ul>
Next Cancel

5. Once you click Next the following screen will be shown confirming that the printer is connected and recognised.

- 6. Click the Next button to continue.
- 7. At the below screen click the Next button to continue.

8. You will now see a new screen in which you must allow the file to be downloaded to your computer.

11. Once you have clicked on Save, it will save the file to your Desktop:

Download complete
Download Complete
Printer_Config.exe from 192.168.0.1
Downloaded:       44.0KB in 1 sec         Download to:       C:\Users\Admin\Printer_Config.exe         Transfer rate:       44.0KB/Sec         Ose this dialog box when download completes <u>Run</u> Open <u>Folder</u> Close

12. Double click on the icon saved on your Desktop:

13. If prompted for the below example, click the Run button.

14. You will see the below screen indicating that the software is installing:

15. You will then be prompted to make it the default printer, we recommend you click Yes.

Printer_Config		X
Do you want to set HP Deskjet F2200 series ->>IP_1 be default printer?	192.168.0.1_9100(usb_p	port1) to
	Yes	No

16. You will then be asked to print a test page, so ensure you have paper in your printer:

Printer_Config
Printer HP Deskjet F2200 series ->>IP_192.168.0.1_9100(usb_port1) config complete. Do you want to print a test page?
Yes <u>N</u> o

17. You printer should now start printing a test page..

## TROUBLESHOOTING

- If you have not installed your printer, then we would recommend searching on your printer manufacturers web site for drivers which contain the bare bone drivers needed for your printer to be installed. If the printer has not been installed, then you will be prompted for the drivers to be installed.
- If your printer is not recognized nor seen to print any document then unfortunately your printer is an unsupported model.
- If you find your printer successfully able to print, though does not print the entire document, your printer is not 100% compatible with the D-Link DIR-320. Perhaps in future firmware updates, this could be resolved for more supported printer models.
