PRODUCT SETUP

WEB-BASED SETUP

Step 1

Position your DIR-612 near your Internet-connected modem and PC. Keep the router in an open area for better wireless coverage.

Step 2

Unplug the modem Ethernet cable connected to your computer and plug it into the port labeled 'INTERNET' on the router. Connect the supplied power adapter to the router and a power outlet, then verify that the power LED is on.

Step 3

Plug one end of the supplied Ethernet cable into the port labeled '1' on the back of the router, and the other end into the Ethernet port on your computer.

Step 4

Open a browser on the connected computer. If you are not automatically directed to the D-Link Setup Wizard, go to '<http://192.168.0.1>' and follow the onscreen instructions to configure your DIR-612. Use 'admin' as your username and password.

TROUBLESHOOTING

SETUP AND CONFIGURATION PROBLEMS

1. HOW DO I CONFIGURE MY DIR-612 ROUTER MANUALLY?

- Connect your PC to the router using an Ethernet cable.
- Open a web browser and enter the address '<http://192.168.0.1>'.
- The default username and password is 'admin'.
- If you have changed the password and can not remember it, you will need to reset the router to return to an empty password field.

2. HOW DO I RESET MY DIR-612 ROUTER TO FACTORY DEFAULT SETTINGS?

- Ensure the router is powered on.
 - Press and hold the reset button at the bottom of the device for 10 seconds.
- Note:** Resetting the router to factory default will erase the current configuration settings. To re-configure your settings, log into the router as outlined in question 1, then run the Setup Wizard.

3. HOW DO I ADD A NEW WIRELESS CLIENT OR PC IF I HAVE FORGOTTEN MY WI-FI NAME (SSID) OR WI-FI PASSWORD?

- For every PC that needs to connect to the router wirelessly, you will need to ensure you use the correct Wi-Fi Name (SSID) and Wi-Fi password.
- Use the web-based user interface (as described in question 1 above) to check or choose your wireless settings.
- Make sure you write down these settings so that you can enter them for each wirelessly connected PC. The back of this document features an area to record this important information.

4. WHY CAN'T I GET AN INTERNET CONNECTION?

- For ADSL users, please contact your ISP to make sure the service has been enabled/connected by your ISP and that your ISP username and password is correct.
