

# Frequently Asked Questions

## Q1 What is the default login details for the router?

(if you didn't change the details in the setup wizard)

Username: admin Password: admin

**Please note:** it is a security risk to leave the default password as admin & admin. It is highly recommended to set your own unique password.

## Q2 I only received 1 LAN cable in the box but I need 2 to do the setup. Am I missing a cable?

No. The LAN cable supplied with your router is to connect your computer/laptop to the router during setup. The ONT device should have come with a LAN cable for connecting it to the WAN port on the back of the router. If you can't find a second LAN cable to connect your router to your laptop for the setup, you will need to do the setup over Wi-Fi.

## Q3 What if the hardware connection keeps failing on step 1?

Please contact your ISP and verify that your ONT device and Fibre line is active

## Q4 I did the setup over Wi-Fi but got disconnected on the Wireless Network step of the wizard. What do I do now?

**If you changed your Wi-Fi username and password:** Open your Wi-Fi settings on the device you used to setup the router. Select the new Wi-Fi name you set from the list of available networks and enter the password. Once connected reopen the webpage at 10.0.0.2 to complete the setup.

**If you changed only your Wi-Fi password:** Open your Wi-Fi settings on the device you used to setup the router. Select the router's Wi-Fi name and forget the network. Now reselect your router's Wi-Fi name and type in the new Wi-Fi password you set on the wizard. Once connected reopen the webpage at 10.0.0.2 to complete the setup.

## Q5 What do I do if while in the Router web interface my browser locks up / goes white / says undefined?

If this happens, please clear your browser cookies & cache and reload the page.

## Q6 What is the difference between 2.4GHz and 5.8GHz Wi-Fi?

**2.4GHz:** Better Wi-Fi coverage but more interference. Compatible with all phones with Wi-Fi.

**5.8GHz:** Faster Wi-Fi speeds & less interference but less Wi-Fi coverage. Only visible to 5G capable phones.

# DIR-822K

# Quick Install Guide

Use this step-by-step guide to set up your router

## Package Content

DIR-822K Router

Power Supply

RJ-45 Ethernet Cable

Quick Install Guide

Status LED

- On
- WAN connection Online
- WAN connection Offline
- Resetting device

**Please contact your Internet Service Provider for assistance if:**

The device was configured and the LED was previously green but suddenly goes red

# Start Here

01

## If you have a Fibre service

Connect the Ethernet cable supplied with your Fibre device (ONT) to a LAN port on the ONT. Then connect the other end of the cable to the WAN port on the back of the router

Fibre to home

02

Connect the power connector of the power supply to the power socket at the back of the router.

Plug the power supply into the wall outlet. Switch the wall outlet and the router on.

Power Supply Power outlet

03

You can set up your router using Wi-Fi an Ethernet cable or D-Link Assistant APP.

### Ethernet cable:

Connect the grey RJ-45 Ethernet cable to any LAN port at the back of the router and the other end into your PC LAN port.

### Wi-Fi:

Use the default Wi-Fi SSID and password (WPA PIN) printed on the bottom of the router to connect your Wi-Fi enabled device to the router.

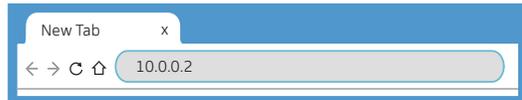

04

### If you are using an Ethernet cable / Wi-Fi to complete the setup:

Launch an Internet browser (Google Chrome, Firefox, Internet Explorer, Safari, etc.) on your connected device.

In the URL web address field, type **10.0.0.2** and press enter. The Setup wizard will start automatically. Please follow the steps of the wizard to finish the configuration of the router

## Quick Setup Wizard

05

### Fibre setup

A. Click **Test** to verify that your Fibre is connected correctly.

B. If a green message confirms "Hardware interface connected properly" click **Next**

Select Interface Type:

**Note:** If a red message appears stating "Eth Connection incomplete" please confirm that the cable from the LAN port on the Fibre ONT device has been inserted into the WAN port on the back of the router.

## DHCP test passed!

A1

### Wizard Step 2

The router will now run a test to determine which account type you have.

If DHCP test passes, click Next to set your **Wi-Fi name & Password**.

Select Mode:

Click Next to Proceed

## Continue to Step 6

OR

## PPPoE test passed!

B1

### Wizard Step 2

The router will now run a test to determine which account type you have.

If PPP test passes, click Next to go to **step B2**

Select Mode:

### ISP Account Username & Password

User Name:

Password:

Confirm Psw:

**Note:** The Username & Password will never be Admin and Admin

Click Next to Proceed

B2

### Wizard Step 3

Your Internet Service Provider (ISP) Account Username & Password will be **supplied to you by your ISP (usually via SMS)** and will look something like this: **yourname@telkomsa.net**

B3

### Wizard Step 4

Once account details test passes, click next to proceed.

Configured account is valid

Click Next to Proceed

## Continue to Step 6

06

### Wi-Fi Details

Set a Wi-Fi name (**SSID**) and Password (**WPA Preshare key**) for both the 2.4GHz and the 5GHz.

It is recommended to have a **different name** for the 2.4G & 5G band.

For the difference between 2.4G & 5.8G please refer to the FAQ.

### Wi-Fi name & Password

SSID 2.4GHz:

2.4G WPA key:

SSID 5GHz:

5G WPA key:

07

### Login Details

Set an **AdminName** & **AdminPassword** for logging into the router.

These details allow you to log into the router if you want to change any settings.

### Web login details

AdminName:

AdminPassword:

Confirm Password:

08

### Telkom VPN Lite

Enter your Telkom VPN Lite details in the provided blocks.

If you are not a Telkom VPN Lite customer you can skip the step

Site Username:

Site Password:

Confirm Password:

LAN IP/Netmask:
