# DIR-X5460 Firmware Release Notes

**Firmware: FW v1.10**
**Hardware: Rev. Ax**

## Enhancements:

- Support D-Link Easy Mesh.

- Support New Parental Control to replace original website filter function.

- Support Extender Mode.

## Problem Resolved:

- Change default wireless security to WPA2-persional

- [DGC20210208000003] DIR-X5460 cannot watch MOD TV channels under PPPoE type

- [DUSA20210113000004] Customer gets a weak security message when connecting to the Guest network

- [DUSA20210217000003] Customer is creating a schedule for Wi-Fi, and it doesn't work.

- [DUSA20210114000001] Unable to connect IOS device to VPN with his DIR-X5460 router.

- [DGC20201130000002] IPV6 disconnected issue

- [DI20201231000002] ISP compatibly issue on IPTV and IPv6.

## Note:

- Suggest reset device after upgrade to v1.10 version because of new function support.

- The Website Filter rule will be removed after upgrade to v1.10.
