DSL-2750U Print Server Setup On Windows 7

Your printer's printer language should support the IPP protocol, Please make sure the unit is on the latest firmware. You can download the firmware at <u>ftp.d-link.co.za</u> . If you are still unsure as to which firmware to download, then simply e-mail your query to <u>support@d-link.co.za</u> or call the D-Link Africa offices on +27 (0)12 661 2025/3 <u>How to Update the Firmware (If your unit is on the latest firmware, skip this step):</u>

Logon to the unit through your web browser via the default IP address of the DSL-2750U

Firmware Update Access Controls Diagnostics System Log Logout	FIRMWARE OPDATE Step 1: Obtain an updated firmware image file from your ISP. Step 2: Enter the path to the image file location in the box below or click the "Browse" button to locate the image file. 2 Step 3: Click the "Update Firmware" button once to upload the new image file. NOTE: The update process takes about 2 minutes to complete, and your DSL Router will reboot. Please DO NOT power off your router before the update is complete. FIRMWARE UPDATE Current Firmware Version : AF_1.00_T10			Please Note: This page displays your device firmware version and information that will be helpful for D-Link technicians should you require any technical support. If your router is working without issue, there should be no need to update your firmware. This information is just for your reference as it is often unnecessary to upload new firmware to your router.
