## DSL-2650U Printer Server Configuration Procedure for Windows 7

## 1. Introduction

This application notes explain the steps of enabling the Printer Server function in DSL-2650U under Windows 7 platform

## 2. How to enable on-board Printer Server function

Following steps show how to enable Printer Server feature.

Step1: Enable Print Server from DSL's WebUI.

Check **"Enable on-board printer server"** and key in **"Printer name"**, **"Make and model"** (EPSON EPL-6200 is taken as example, named "EPL-6200")

Note: The "Printer name" can be any text string up to 40 characters.

The "Make and model" can be any text string up to 128 characters.
