## **D-Link Africa Setup Guide Document.**

### How do I setup my DSL-504T to connect to the Internet?

Step 1 : Change you Local Area Connection IP to a Static IP e.g. 192.168.1.45. Your default Gateway must point to the DSL-504T (Default IP is 192.168.1.1). The two DNS IP's are given to you by your ISP and they need to be entered as well.

Internet Protocol (TCP/IP) Properties					
General					
You can get IP settings assigned automatically if your network supports this capability. Otherwise, you need to ask your network administrator for the appropriate IP settings.					
Obtain an IP address automatically					
• Use the following IP address:					
IP address:	192.168.1.45				
Subnet mask:	255.255.255.0				
Default gateway:	192.168.1.1				
○ Obtain DNS server address automatically					
• Use the following DNS server addresses:					
Preferred DNS server:	196.7.0.140				
<u>A</u> lternate DNS server:	196 . 7 . 142 . 132				
Ad <u>v</u> anced					
OK Cancel					

**Step 2**: Open Internet Explorer and enter the default IP address of the DSL-504T, which is 192.168.1.1 (The default login Username and Password is **admin**)
