Revision History

Software Version	Model	Release Date
Server: v1.0.0.45 Probe: v1.0.0.45	DV-800S DV-800E DV-800T	2021/7/1

System Requirement

Applications	System Requirements
D-View Server	1. CPU: Quad-core 3.5GHz or above 2. RAM: 16GB or above 3. HD: 200GB or above (depends on the number of devices been managed) 4. Supported OS, **only supports 64-bit OS, English version** - Windows Server 2012 64-bit (Standard Edition or above with the latest patches) - Windows Server 2012 R2 64-bit (Standard Edition or above with the latest patches) - Windows Server 2016 64-bit (Standard Edition or above with the latest patches) - Windows Server 2019 64-bit (Standard Edition or above with the latest patches) - Windows 10 64-bit (Professional Edition or above with the latest patches) - Ubuntu 14 64-bit or above - Debian 10 64-bit or above 5. Database: MongoDB 4.0 or above 6. Web Browsers - Microsoft Edge - Chrome - Safari - Firefox
D-View Probe	1. CPU: Dual-core 3.0GHz or above 2. RAM: 4GB or above 3. HD: 200GB or above 4. Supported OS, **supports 64-bit OS, English version** - Windows Server 2012 64-bit (Standard Edition or above with the latest patches) - Windows Server 2012 R2 64-bit (Standard Edition or above with the latest patches) - Windows Server 2016 64-bit (Standard Edition or above with the latest patches) - Windows Server 2019 64-bit (Standard Edition or above with the latest patches) - Windows 10 64-bit (Professional Edition or above with the latest patches) - Ubuntu 14 64-bit or above - Debian 10 64-bit or above 5. Managed Capability: 500 nodes
D-View Client	1. CPU: Dual-core, 3.0GHz or above 2. RAM: 4GB or above

	3. HD: 100GB or above 4. Web Browsers - Microsoft Edge - Chrome - Safari - Firefox

Installation and Upgrade Instructions:

1 Visit D-View Web site https://dview.dlink.com/ to get the latest software version.

2 D-View Server Installation or Upgrade:

Please refer to D-View 8 User Manual to install or upgrade your D-View 8; be sure to read through following notices before you start the installation/upgrade processes.

2.1 If you install D-View 8 on Windows OS, please execute "D-View 8_1.0.0.45_Installation.exe" file and follow the step-by-step procedures in the user manual.

2.2 If you install D-View 8 on Linux OS, such as Ubuntu or Debian, please execute "D-View8_1.0.0.45_Installation.deb" file and follow the step-by-step procedure in the user manual.

3 D-View Probe Installation or Upgrade:

3.1 For users who install remote probe for the first time.

- Please download probe installation software from D-View Web site and execute that installation file.

3.2 For users who already install probe

- D-View will automatically check Probe's software version and processes the software upgrade procedure if any newer software version available.
