Found New Hardware Wizard

Welcome to the Found New Hardware Wizard

This wizard helps you install software for:

Ethernet Controller

If your hardware came with an installation CD or floppy disk, insert it now.

What do you want the wizard to do?

(•) Install the software automatically (Recommended)
(○) Install from a list or specific location (Advanced)

Click Next to continue.

[< Back] [Next >] [Cancel]

Hardware Installation

The software you are installing for this hardware:

D-Link RangeBooster N 650

has not passed Windows Logo testing to verify its compatibility with Windows XP. (Tell me why this testing is important.)

Continuing your installation of this software may impair or destabilize the correct operation of your system either immediately or in the future. Microsoft strongly recommends that you stop this installation now and contact the hardware vendor for software that has passed Windows Logo testing.
