Setup Guides

[G2562DX Configuring Port Forwarding]

The below steps will guide you to Manually Configure Port forwarding on the router.
(Please ensure you are connected to the router either on Wi-Fi or Ethernet cable)

1) Login to the device WEB GUI using 10.0.0.2 and Use Username: admin Password: admin/admin1.

2) Navigate to Advanced Setup →Port forwarding →Click add Rule.

3) Add your Port forwarding Information below:
   Make sure the following are correct.
   - Ensure Nat Loopback is Ticked.
   - Protocol is TCP / UDP.
   - Remote Port and Local Port must be the same.
   - Remote IP (only if you want a single specified device to access)
   -Local IP Address (Select your device from the list or specify one using "self-define"
   -Comment (Give the Rule a name for identification)

Add Rule	✕
* Interface:	DHCP_WAN_ETH/eth0.1 ⌄
* Local IP Address:	self-define ⌄
	99.99.99.99 ⊗
Local Port:	80 ⊗
Protocol:	TCP/UDP ⌄
Remote IP Address:	
Remote Port:	80 ⊗ - 80 ⊗
Nat Loopback:	✓
* Comment:	Example ⊗

Cancel   Reset   Save & Apply

➔Click Save & Apply once done.

4) Please note the following if port forwarding is not working:
   - Make sure that the devices are on the same IP range.
   -Make sure if you are using a DVR, that the DVR has the routers IP address configured as the "Default gateway".
   - Not all online port checkers work.
   - Make sure that you configured the rules on the correct "WAN" connection.
   - Make sure that you are opening the correct ports.

End
