

[Basic Manual Setup for G413X- Basic Wizard Setup for LTE]

Before you start: Please make sure that a NANO sim is inserted in the router and the sim is activated by your ISP & has data.

- 1) On a device that is connected to the router (preferably with a cable on a pc/laptop or Wi-Fi on a phone is fine but please make sure your mobile data is off).

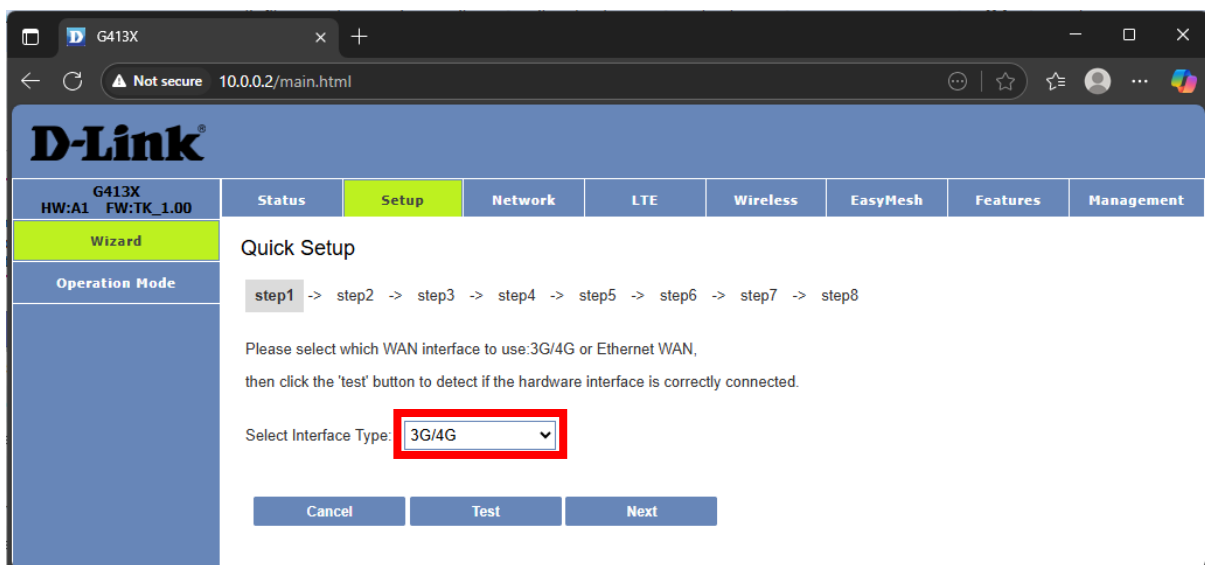

Note: this config is best done with a LAN cable.

- 2) Open a web Browser (internet explorer/google chrome/Firefox) input the IP address of your router (default is 10.0.0.2 unless it was changed), we will use Microsoft Edge in this example.

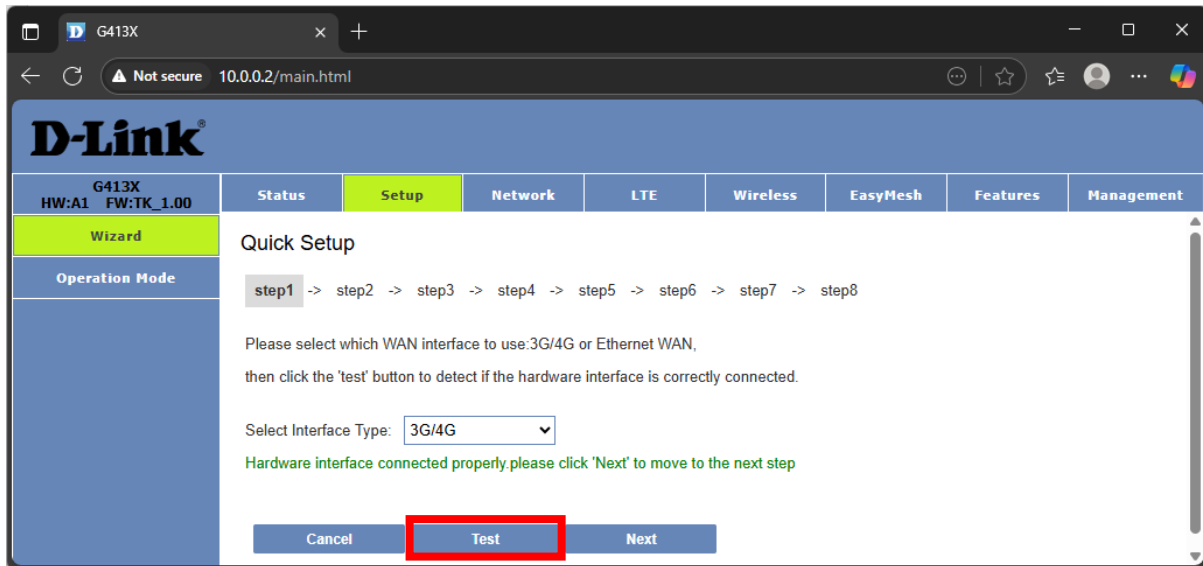

The screenshot shows the D-Link G413X web interface in a Microsoft Edge browser. The address bar shows "10.0.0.2/main.html". The interface has a top navigation bar with tabs: Status, Setup (highlighted), Network, LTE, Wireless, EasyMesh, Features, and Management. Below the navigation bar, there's a left sidebar with "Wizard" and "Operation Mode" options. The main content area is titled "Quick Setup" and shows a progress bar with steps 1 through 8. Step 1 is currently active. Below the progress bar, there's a text prompt: "Please select which WAN interface to use: 3G/4G or Ethernet WAN, then click the 'test' button to detect if the hardware interface is correctly connected." Below this prompt, there's a "Select Interface Type:" label followed by a dropdown menu currently set to "ETH". At the bottom of the main content area, there are three buttons: "Cancel", "Test", and "Next".

- 3) Change the Interface Type to 3G/4G

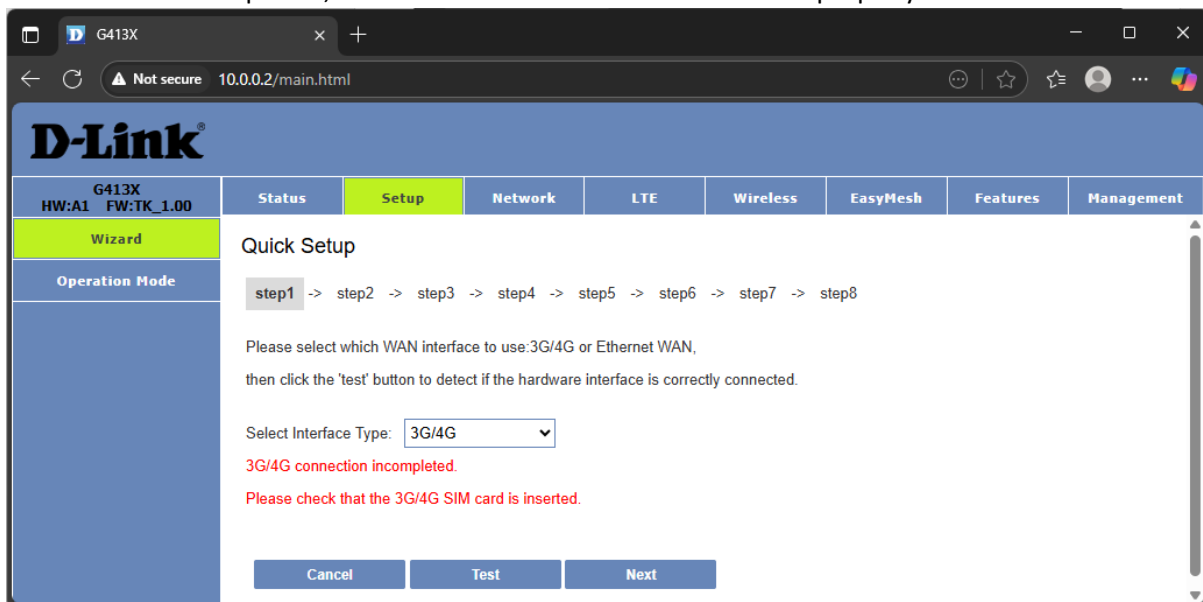

This screenshot is similar to the previous one, showing the same D-Link G413X web interface. However, the "Select Interface Type:" dropdown menu is now set to "3G/4G". The "Test" button is highlighted with a red rectangle, indicating the next step in the setup process.

4) Click on [Test] as per the instructions.

a. If it passes, it will show Hardware interface connect properly.

b. If it fails, it will show 3G/4G connection incomplete, please re-insert your SIM card and restart the router.

5) Click on [Next] as per the instructions
